 - **JOB DESCRIPTION:** I created the 2D perspective of machines and designed a logo for the company including their brochure.

PROJECTS DONE

- **Final B.E Project: TRADECART:**
 - Tradecart is a web project made with JAVA with struts framework including hibernate JPA annotations. This website is a shopping site for industries to use in order to purchase RAW materials or by-products (i.e., waste, which are RAW materials for other industries) produced by other industries. You can find my complete project under this link: <https://drive.google.com/open?id=1Pk1cDPw6aiDC2fL81izkehJlmlncLAAE>
- **Graphic Designs and Multimedia Projects:**
 - All the artworks I created, I displayed the consideration for the understanding of a character expression while working with precision on small details which depicts the nature of a character, which shows the message behind the art. I also considered customers' requirements while constricting my artwork. You can find my portfolio link below: <https://www.vikshitganjoo.com>
